About Ekopak

Ekopak is an ESG-driven (environmental, social and governance) off-grid water solution company. The Company's solutions allow industrial customers to reduce their water consumption in a sustainable, reliable and cost-effective manner. Ekopak focuses on optimizing customer water use through

containerized water purification units that transform off-grid water sources such as rain-, surface- and/or wastewater into cleaner water that can be used and reused in the customer's industrial processes. By allowing water to be cleaned and reused, Ekopak's systems turn water consumers into water producers. The resulting circular water systems save customers money by producing clean water for industrial processes at a substantially lower cost per cubic meter than traditional tap water sources. At the same time, by using water more efficiently, and in many cases recapturing heat from wastewater that would otherwise be lost upon discharge, Ekopak's solutions allow industrial water consumers to make measurable progress toward their water-related and CO2 reduction ESG targets.
